COMPLIES With:

ASTM F1487-17

CPSC PUB #325

ADA Compliant

Add a bit of sweetness to your preschool playground with the Extra Gumball Play Structure. The majority of the structure is at a 3-foot deck height keeping children at a comfortable height where they can explore near the ground. Designed around a central hexagonal deck, a Tic Tac Toe Panel is at the ready for a quick game and across is a Gear Panel just waiting to have its brightly colored gears turned. Children can exit the main deck via a Straight Slide or a Right Turn Slide. Once at ground level again, children will be amazed by the Ship's Wheel, Rain Wheel and Single Drum that are on different posts on the structure. Once they have spun the Ship's Wheel and Rain Wheel and found a new rhythm on the drum, the Disc Climber will entice them with its circular steps leading up a post back to the main deck. A Transfer Station at the other end works well for those that would rather take the stairs or for those that would like to hop out of their wheelchair to play on the main structure. The Extra Gumball Play Structure is ADA compliant making it an excellent choice for public places, schools and daycares. Additionally, it is fully color customizable with any of our powder coat paint and rotationally molded plastic colors.
