

MyTCoat Expanded Metal Deluxe Frame Round Table

MSRP \$1,533.00

SALE \$1,303.00

Highlights:

- Balanced for stability and security
- Smoothly edged seats and tabletop
- Umbrella port lets you add extra shade
- Triangular support located underneath each seat

Take a seat, relax, and enjoy the outdoors at the MyTCoat Expanded Metal Deluxe Frame Round Table. This commercial-grade furniture unit is constructed of rugged bonded metal arranged in a stable configuration that can handle years of regular usage. The center of the table appears to whimsically float over the ground while, in fact, its support column is really connected to each of the slightly curved bench seats around it. The table comes in three different models, of which two are specially designed as ADA accessible seating configurations. The expanded steel of the tabletop and seat surfaces is shaped into a diamond pattern that is both an attractive visual and a practical cleaning enhancer, as the airflow will accelerate drying after rains. The frame itself is finished with a powder coat paint for optimum durability and a glossy look. And the thermoplastic material used on the seat and table surfaces is purchasable as either an industry-standard covering or in MyTCoat's proprietary Advantage coating. Finally, the tabletop's central umbrella port lets you add some overhead of shading to your recreation area.
