As a key component of the Infinity Express Train Set, the Passenger Car offers kids a feeling of autonomy as well as an imaginary role on a train. Complete with 2 spacious bench seats and 4 steering wheels, this structure functions as a piece of a larger set, but can be just as immersive as a stand-alone feature. The rounded exterior and decorative wheels offer an opportunity for kids to imagine themselves driving a car, or riding in a train. Built entirely from commercial-grade HDPE plastic, rest assured that your kids are safe and your investment is sound. This Passenger Car is designed to endure all seasons, in addition to the casual wear and tear. On top of that, this structure now comes available with in-ground stakes for permanent installation at no additional cost.
