If you're looking for the perfect capstone to your trike course playset, look no further than the General Store Trike Storage. Not only does it add the perfect veneer of community immersion to this imaginative playscape, it also doubles as a storage closet for the trikes at the end of the play session. Adorned with various advertisements and numerical values, this can also serve as a utility for educational exercises related to business and mathematics. This commercial-grade HDPE plastic structure weighs in at 475 pounds, spanning 7 feet 11 inches long, 3 feet 9 inches wide, and 3 feet 11 inches tall. This structure also includes a plastic gas pump, but for the full experience, we recommend the stand-alone gas station structure.
