When looking for outdoor furniture, whether or not it should be mobile needs to be the first question you ask yourself as a portable table can provide a lot more versatility to your outdoor area. Something like this table is an excellent solution. Its round, forty-six-inch tabletop puts everyone equally close to the center so that they can easily pass dishes in meals or play games. And since the table has a solid surface, it is completely level and can hold small objects like dice, puzzle pieces, and craft supplies. And with its portable base, you don't need to pick a permanent place for it to stay. It can be transported to wherever it is needed. There is a pre-drilled hole in the middle of the tabletop, allowing you to add an umbrella to the table.
