

MyTCoat Expanded Metal Occupational Table

MSRP \$593.00

SALE \$504.00

Highlights:

- Dual posts on either end with curved angles on the bottom
- Additional strength from the supports under the tabletop
- Steel construction for heightened durability
- Legs and supports are powder coat painted for extra protection

There are any number of tasks that benefit from the presence of a portable table: bake sales, a merchant center at a concert, selling items at a fair, hosting a fundraising event, a wedding buffet, and many more events that indoor and outdoor venues will see. The Expanded Metal Occupational Table from MyTCoat is the perfect choice for those wanting to maximize success in those cases. Standard plywood folding tables that other companies sell become rickety over time after years of use; they don't have the same level of durability that comes from the rigorous steel construction of the Expanded Metal Occupational Table. This commercial-grade outdoor furniture unit comes in a variety of colors that are available in both Industry Standard and Advantage thermoplastic coating. Speak with a AAA State of Play salesperson to learn more about selecting hues for the table that will best match your desired theme.
