

MyTCoat Trash Receptacle Surface Mount

MSRP \$88.00

SALE \$76.00

Highlights:

- Powder coated for lengthened durability
- Ensures a way to secure a 32-gallon trash can
- Anchors easily into both a trash can and the surface
- Designed to handle weather over long periods of time

One of the worst things that can happen to a trash receptacle is that it can tip over and spill trash all over patrons. With the Trash Receptacle Surface Mount, you can ensure that your bin isn't going for a trip or a short flight anytime soon. Fashioned out of steel, the Trash Receptacle Surface Mount is going to keep your trash can in-line. There are pre-drilled holes on the bottom and top of the unit to securely attach it to both the trash bin and the ground. This will keep the bin in place during harsh weather and prevents people from moving or stealing it. The surface mount is built to bind to any of MyTCoat's trash receptacles and it was designed to work on hard surfaces such as concrete. It is perfect for fairgrounds, parks, boardwalks, tourist areas, universities, and many other locations. Basically, it works almost anywhere that you would find large numbers of people outdoors.
