

MyTCoat Ubrace Umbrella Support

MSRP \$59.00

SALE \$51.00

Highlights:

- Quick and easy to install
- Low-profile, sleek design
- Works with most MyTCoat tables
- Takes up less space than a traditional umbrella weight

With this handy Ubrace Umbrella Support, you can easily install an outdoor umbrella into a picnic or patio table that has a pre-drilled hole for umbrellas. The Ubrace presents a simple solution for a common problem that typically requires a large umbrella brace to be used instead. This unit features an inconspicuous design that is unobtrusive. Best of all, it is very easy to use. Simply slide the pole of the umbrella through the pre-drilled hole located in the center of the table, open the brace, and clamp it around the pole underneath the table. Just like that, your umbrella will be firmly locked into place so that it won't blow around in the wind, threatening to topple the table. It will keep your umbrella upright to keep your patrons shaded from the sun, allowing them to cool down during the hot, sweltering summer days.
