

MyTCoat Honeycomb Steel Stacking Chair

MSRP \$435.00

SALE \$370.00

Highlights:

- Armrests on each side for a relaxing seat
- Chairs slide easily together for quick stacking
- Formed out of galvanized steel for added strength
- Coating adds extra protection to keep it looking great for longer

MyTCoat Honeycomb Steel Stacking Chairs are a superb seating option for any outdoor venue. Each chair is made from galvanized steel tubing with protective powder coat paint and sturdy sheet metal to form the actual seat. This makes them sturdy and can withstand long-term use. The seat itself can be coated in either of MyTCoat's thermoplastic coatings: Industry Standard for everyday wear and for those who need or want extra protection, Advantage. These durable coatings allow the chairs to be used outdoors as they protect it from harsh damage that the weather can cause over time. The coatings themselves come in a multitude of colors to allow for a flexible color palette. Talk to a sales representative for more options. An added advantage of the Honeycomb Steel Stacking Chair is the stacking feature. Now it is possible to move chairs out of the way or keep extras in storage without taking up too much space.
