

MyTCoat Honeycomb Steel Round Patio Table with Seats

MSRP \$1,689.00

SALE \$1,436.00

Highlights:

- Comfortable distance between seats and table
- Galvanized steel frame is built to handle daily use
- Full circular metal support for table between the legs
- One piece of furniture that has four seats and a table

The Honeycomb Steel Round Patio Table with Seats is a complete outdoor furniture set that allows you to move conversations and meals outside. Take advantage of the fresh air and your outdoor location by spending time there sharing drinks, meals, conversations, and games with friends. The table's clever design includes four seats, which branch off from the center. The table, seats, and pattern of perforated holes in the metal all have circular shapes, giving it a highly unified and charming appearance. Since the seats are connected to the portable base of the table, the whole lightweight structure can easily be moved at once without the need to make trips. Its connectivity helps prevent seats from being taken away by vandals, as might occur with separated benches. And the perforations in the surfaces accelerate drying of the outdoors furniture after a rainstorm.
