- Central posts connect the benches to the core of the table

The Honeycomb Steel Portable Frame Square Table is an excellent outdoor table that can be used anywhere for any purpose. Its portable base makes it highly mobile, allowing it to be easily moved from place to place by one or two people. However, it still has enough weight that it will stay where it is placed and it has enough structural strength from the galvanized steel frame as to not be flimsy. Its wide square surface leaves space for plenty of dishes and plenty of people during outdoor meals or study sessions. The table is coated in a layer of protective thermoplastic that not only guards the metal against scratches and water damage but also offers you the opportunity to customize your seats and tabletop with a variety of different colors. Choose between the Industry Standard coating, which will keep the table nice for years to come, or the Advantage option that is even sturdier than the already noteworthy Industry Standard.
