Highlights:

- Wide area of space below the tabletop and seats
- Can work well alone or as part of a larger group of seating
- Room for wheelchairs with ADA seating options
- Supports for each individual seat off of the central steel post
- Rounded seats create a close intimacy while allowing for individual space

The MyTCoat Expanded Metal Single Post Round Table is a perfect outdoor picnic table for eating, socializing, and much more. This sturdy table is firmly rooted to the ground by its strong central column. This large 4-inch square steel column holds up the table as well as up to four seats. Each seat is supported by a 3-inch thick steel arm. ADA accessible models of this table, with three or two attached benches to make the remaining sides wheelchair friendly, are also available. The ADA models allow persons with wheelchairs or mobility devices to easily join at the table with an open space without a seat. Each of the bench seats is wide enough to comfortably fit multiple people at once. The entirety of the table is constructed from steel tubes or expanded steel for its strength. To protect the steel, the frame is then powder coat painted and the seats and tabletop are dipped in your choice of Industry Standard or Advantage thermoplastic coating.
