

MyTCoat Outdoor Grill

MSRP \$460.00

SALE \$391.00

Highlights:

- Box features a lip at the bottom to keep coals in
- Black powder coat painted to keep it looking new
- Swivels on its post allow it to turn away from wind
- Two handles on either side to help move the grate around

This Outdoor Grill provides a permanent station where people can grill up their favorite foods outdoors. The lower basin can be filled with charcoal or wood so that it is safely contained. The adjustable grate can be adjusted to four different heights helping users cook their food with the perfect amount of heat. The steel grill, grate, and post are coated in a heat resistant powder paint which keeps it looking nice even after heavy use. The finish and adjustable grate make it easy to clean. Simply lift the grate up to the highest position to reach the ashes beneath. An added advantage to the adjustable grate versus a lift up grate is that it contains fewer moving parts to be affected by the elements over time. An in-ground mount firmly positions the grill in the Earth while a surface mount can be used to secure it to a concrete surface. A swivel allows the unit to move to turn away from the wind. This grill is perfect for any park, campground or recreational area where people want to come together and enjoy a good meal with friends or family.
