

MyTCoat Trash Receptacle In-ground Mount

MSRP \$88.00

SALE \$76.00

Highlights:

- Hides away easily underground
- Designed to keep your trash can in place
- Simple to install to the bottom of the bin

The Trash Receptacle In-ground Mount is a perfect way to securely and permanently fasten your trash receptacle in place. The bottom part of the mount goes deep into the ground, where it is held in place by concrete. There are pre-drilled holes on top of the unit to anchor it to the bottom of the trash bin. This mounting hardware holds the receptacle in place to keep it from getting knocked over by visitors or weather conditions. It will keep the trash bin in place during windy days or harsh weather to prevent the trash from spilling all over the place and keep your community spotless. It will also prohibit people from moving or stealing the trash receptacle, giving you peace of mind. This mount works great on most outdoor surfaces, making it perfect for outdoor use and areas such as fairgrounds, parks, universities, and many more locations.
