

MyTCoat Expanded Metal Portable Frame Octagon Table

MSRP \$1,245.00

SALE \$1,059.00

Highlights:

- Three different seating choices including ADA Accessible options
- Powder coat painted steel helps protect frame
- Seat and tabletop coatings offer many color choices
- Central umbrella port to add additional protection and shade

For a sturdy and versatile table that can be moved from one outdoor location to another with ease, the Expanded Metal Portable Frame Octagon Table is a splendid option. The portable base and attached benches make it easy to move around without making multiple trips. Its octagonal shape is strategically designed to help people get in and out of the seats without a struggle while also removing sharper corners that could be potentially dangerous for children playing in the area. The frame is painted in a powder coat while the tabletop and seats are layered in a thermoplastic coating to ensure the table looks like new even after long-term use. A pre-drilled hole in the middle of the tabletop is there so you can place an umbrella to further protect you and your table. A variety of color options are available, allowing you to customize it and match it with the rest of your site amenities. Be sure to contact a sales representative for more details.
