- 2 and 3-seat options have larger tabletops to fit wheelchairs
- This table is anchored by a 4-inch central post

The MyTCoat Honeycomb Steel Deluxe Frame Square Table is one of MyTCoat's sturdiest and most compact tables available. It has a tidy square design with a long bench attached on each side in the four-seat model. The benches are independently supported, making each of them very strong and large enough to support multiple people. The tabletops are larger for the two and three-seat options to accommodate wheelchairs. This transforms into an ADA accessible space where everyone can find a comfortable and safe place to relax, chat, and enjoy a meal. Both the table and seats are made from strong metal with a clever pattern of circular holes cut into them, as well as a layer of a protective coating that helps keep them dry even shortly after it rains while also reducing wear and tear over an extended period. The table is available in a multitude of different colors that you can personally choose from. Contact us for more details.
