Gather 'round and enjoy the MyTCoat Honeycomb Steel Deluxe Frame Round Table. This sturdy table is a bonded structure that upholds each seat independently while also connecting them to the mounted post in the center. That allows the table and seats to stay sturdy, not becoming wobbly or bending out of shape over time. The large, 46-inch table and seats are made from sturdy sheets of galvanized steel with an ordered pattern of circular holes cut into them. The curving seats follow the curvature of the table. Each seat is long enough to provide comfort to multiple guests while still allowing space so people can get up and sit down easily. With different mounting, seating, coating, and color options available, you can be sure the MyTCoat Honeycomb Steel Deluxe Frame Round Table can go where you need it and look great in any area that you place it.
