

## Electrogalvanized 3/16-inch Steel Swing Chain (per foot)

**MSRP \$3.00**

**SALE \$2.10**

### Highlights:

- Compatible with most swing hardware
- Comes measured and cut to requested length
- Galvanized steel for water and rust resistance
- Easily cut with chain cutters if lengths need to be adjusted for bucket seats

### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Time can wear out just about anything, even if it is made from galvanized steel which is why we offer Electrogalvanized 3/16-inch Steel Swing Chain by the foot. Even if time isn't the culprit, there are instances that the chain currently holding a swing needs to be switched out for belt seats instead of bucket seats requiring a longer chain. In those cases, it might make sense to order a few lengths of chain rather than a pail, barrel or drum. In other cases, perhaps you'd like to save the time and effort needed to cut a larger number of chains. If you have twenty or thirty chains to replace, that's a lot of measuring and cutting. We can do all of that for you making your swing maintenance just that much easier. We also offer full swing set kits for those that need to replace multiple pieces.
