COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Swing maintenance is made simple and immediate with the Electrogalvanized 3/16-inch Steel Swing Chain - Pail of 250 Continuous Feet. Unlike our drum or barrel, the pail is the right length for those with a few swing bays to manage and find their storage space to be precious. Delivered in a pail for easy storage, the swing chain can be cut to any length necessary. The chain is compatible with most swing hardware, hangers and seats making it a good item to have on hand. When a chain begins to rust or looking the worse for wear, it's but a moment's work to cut a new length to hang up a belt, bucket or almost any other type of swing. Ordering chains cut to length can be time consuming when instead of waiting, you can have the job done today by preparing for the inevitable.
