- Simple maintenance precaution that can save time and money

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Swing upkeep can be made simpler with our Electrogalvanized 3/16-inch Steel Swing Chain - Barrel of 500 Continuous Feet. When managing multiple swings, ordering chain cut to order can add up very quickly and it takes time for it to ship. An easier option is to purchase a large length of chain that you cut to length on a need to need basis. Whether you have belts or bucket seats and any top rail height, you'll be able to change your chains out with a quick snip from your barrel of chain. The steel chain is galvanized to add another level of resistance to the elements outdoors. The smooth chain will gently fit in the hands of young riders providing them a secure point to hold on without hurting them. The chain comes in a barrel which doubles as a place to keep the long length of chain. Please note: The barrel is not included.
