- Digger and seat spin 360°
- Easy to operate and control

Age Group: 2 to 12 years

Footprint: 6' diameter circle

Use Zone: 18' diameter circle

The Scoop Digger with Seat imitates the larger diggers that most children see on construction sites. The contraption has two handles that can be lowered together and then pulled up to scoop or dump. This item works well in most playgrounds that use sand surfacing. The added seat on this model allows children to utilize the tool more effectively so that they can really get some work done! By spinning the 360° rotating seat, the digger can make a hole in any direction. The Scoop Digger with Seat is designed for children ages 2 - 12 making it a good addition in both 2 - 5 and 5 - 12 year old play areas.
