The Accessible Scoop Digger is an exciting and interactive playground structure which any industrious young mind is sure to enjoy. It has simple controls which are designed to be reachable by children of any age and any physical ability. One handle controls the crane's arm, while the other manipulates the scoop. This way, the child operating it can move scoops of sand to anywhere within the digger's range. They can pretend to be a foreman or construction worker building any sort of magnificent sand structure they can think of. The Accessible Scoop Digger should be installed at the edge of a sandbox or sand pit for best results.
