Assembled Dimensions: 124" x 20" x 43-58"

The Linguistic Panels give children the opportunity to learn and grow in an outdoor environment. The Linguistic Panels teach colors, time, and weather. The interactive color panel uses moving color knobs for children to match the correct color symbols to right animals, fruit, or plants. The clock number panel has a freely moving hour hand for children to learn to tell time and recognize numbers. The weather panel teaches children the names for rain, cloudy, sunshine, snow, and tornado by using symbols paired with the correct words. Each panel is available separately as the Colors Panel, Numbers/Clock Panel, and Weather Panel.
