- Presents both the written word and a visual representation
- Excellent height for most children to use comfortably

Age Group: 6 months to 5 years

Assembled Dimensions: 42" x 6" x 43"

The Colors Panel allows children to play and learn about colors, plants, and animals. The color panel is an educational installation that children can use as they grow. By moving small colored knobs, they can match the colors to the pictures. As they begin to speak and read, they can match their spoken words with the written words. The Colors Panel is available in English, Spanish (bilingual), Cherokee, or a language of your choice so that you can pick the languages that best match your community. When choosing a bilingual panel, children will be given the opportunity to learn even more.
