- Choose the best language(s) for your community
- Matches the symbols with the written words

Age Group: 6 months to 5 years

Telling time is an essential skill that everyone should learn. The Numbers/Clock Panel is a good place for children to start learning that skill. With a clearly printed clock face and numbers, the hour hand can be moved around to the number of their choice. Along the outside edge of the clock there are the words for the numbers printed in the language(s) of your choice. The clock begins introducing children to numbers, reading, and telling time all in one simple station. The Numbers/Clock Panel is especially good for preschools and elementary school areas as an outdoor learning tool.
