**Age Group:** 2 to 5 years

**Assembled Dimensions:** 19' 5" x 5' x 9' 6"

**Capacity:** 15 - 20 children

**Use Zone:** 32' x 18'

The Noah's Ark Recycled Plastic Play System offers kids an excellent and inclusive area for play with a cute Biblical theme. Despite its compact design, which allows it to fit into a safety zone of 32-feet x 18-feet, it is filled to the brim with exciting activities and opportunities for kids to have fun. This includes a fun slide at the 'bow' and 'stern' of the boat for a quick exit and a steering wheel at the helm that lets them captain the whole vessel. Two telescopes are next to the wheel so kids can check the upcoming waves. Kids will marvel at the turning mechanisms of the Oval Gears Panel as they traverse the unit. The rock climbing wall features a rubberized high-density polyethylene (HDPE) board to provide a secure platform as kids scale the structure. Two photo-realistic images of an Ark and animals pair perfectly with the side panels that are decorated with the silhouettes of creatures to add to the Biblical theme. The posts, decks, and steps feature Nature of Early Play's proprietary Recycled Structural Plastic (RSP) to create an environmentally-friendly structure.
