With its fun shape, vibrant colors, and adorable patterns, the Mushroom Bridge is a structure made just for kids. Children who are younger than two will be able to crawl right under it, or climb over the top. The top side of the bridge has stairs, as well as individual hand grips all along the top edges. This makes it especially safe, even when children run across it. There are a number of exciting color schemes to choose from when completing your order. The fun polka-dotted decal on the front of the bridge makes an excellent contrast that really stands out.
