- Railings on either side for safety
- Gentle arch to make crossing it easier
- Six large posts add to the bridge's charm

Age Group: 6 months to 12 years

Unit Size: 6' x 3'

The Natural Garden Bridge is a quaint bridge which looks great in any outdoor park or garden. It can be used to create a passage over a small stream or water feature. It is even great when placed over a bed of flowers, encouraging guests to use the elevated path instead of stepping on them. The bridge has a gently arching shape which makes it easy to cross and almost impossible to trip on. Just in case though, the bridge also has accessible railings on both sides. It also comes in an 8' model, which is great for bridging larger gaps.
