Crawling through tunnels is one of children's favorite parts of any play system. Now you can bring that experience to your playground without the need for the rest of the play system. This Freestanding Tunnel with Mini Posts is an independent structure that allows you to install a tunnel anywhere. The circular entrance to the tunnel is wide enough to accomodate preschool aged kids. The peek-a-boo holes in the side of the tunnel let in some sunlight, and allows young spelunkers in the tunnel to furtively look at their surroundings. The structure uses weather resistant and environmentally friendly recycled plastic materials.
