Lil' Dumpy brings the joy of construction to all ages. This commercial grade HDPE plastic play structure offers children an opportunity to imagine themselves within a modern industrial environment. Steering wheels and painted on tires help complete the facade, with a single front bench and a slide in the place of a dump-trailer. Providing light physical challenges, toddlers and young children can exercise more than just their imaginations. Weighing in at 255 pounds, this structure can be installed indoor or outdoor. Stakes are included, should you choose permanent installation.
