Use Zone: 18' 4" x 14' 4"

The Steam Roller is a fun combo-piece, blending the best features of role-playing structures and active playsets. Structured around a cab with a bench and two steering wheels, two crawl-throughs stand-in for the rolls (the giant wheels). This allows for more interactivity while maintaining the immersion for kids who just want to imagine themselves in an industrial atmosphere. Brightly colored commercial grade plastic helps add a sense of playfulness to the overall presentation and in-ground mounts are included for permanent installation.
