**Age Group:** 6 months to 5 years

**Assembled Dimensions:** 21" X 32" X 80" (2 Posts)

34" X 37" X 80" (4 Posts) 66" X 38" X 80" (6 Posts)

This Electric Vehicle Charging Station is a great addition to any play area, especially alongside a tricycle track. Kids can use the station to supply 'power' to their vehicles or anything else that might need charging up. Its front panel has a graphic that shows charging symbols and has a flexible cord that extends out from it. Electric vehicle charging stations will likely be something that today's children will see a lot more of as they get older, so this is a nice early introduction to them. Adding to the environmental positivity of this structure is the fact that its entire structure is made from recycled plastic material. There are three sizes available.
