Kids can test their gymnastic prowess on this 10 Foot Balance Beam by Nature of Early Play. Whether pretending they are at the Olympics or pretending to be suspended in midair on a circus tightrope, children will hone their gross and fine motor skills as they walk, skip, and jump across the balance beam. At the same time they will be getting lost in hours of acrobatic fun. The 10 Foot Balance Beam is safe for children as young as 6-23 months. It is available in up to three connected, graduated, or uniform heights to fit your playground's unique spatial requirements. Crafted using 100% recycled structural plastic and stainless steel hardware, the Balance Beam is built to last and provides a safe way for children to test their gymnastics, cheerleading, and dance skills.
