- Open sides for children to run through more easily

**Age Group:** 6 months to 5 years

---

Add a bit of small town charm to your child's play with these delightful village houses. This set of two structures includes multiple houses with windows, planter boxes connected by a Palm Panel with a ball toss hole, and two kid-sized benches for easy seating and relaxation. Hunter green arched roofs are painted to look as though they're individually tiled, and flowers in the planters evoke fairytales of old. These quaint and stylish Village Houses are constructed of 100% structural recycled plastic and are designed with great attention to detail to resemble hand-crafted brick cottages. Perfect for a schoolyard, park, or backyard, they're ADA accessible and feature stainless steel hardware.
