Assembled Dimensions: 46" x 46" x 24"/28"

The Sand Table is an excellent activity that allows children to play with sand activities without getting dirty. Traditional sandboxes inevitably cover kid's clothes in sand as they play in them, which then gets tracked inside. With the sand table, kids stand outside of the sand so that the mess is contained. With a nearly four foot diameter and a two foot height, this sand table is best for toddlers and very young children. This height also ensures that the table is accessible to all children. It is quite sturdy, and made from high-density recycled plastic materials.
