Highlights:

- Two fun interactive panels
- Bright colors make them interesting to children
- Clear panels allow children to engage with the falling objects
- Three strong posts support it

Age Group: 6 months to 5 years

A falling apple inspired modern physics. And now, kids can take a cue from Newton and use falling pebbles, water, and sand as sources of inspiration and creativity with the Sand Chute and Ramp Combo. Kids will delight as small objects dance through a winding maze of chutes and ramps, creating a kaleidoscope to engage their imaginations. Suitable for kids of all ages and ability levels, this combined play accessory is ADA accessible and features two clear plastic panels—one red and one blue—so that children can generate graceful parades of objects while working together or side by side. The Sand Chute and Ramp Combo pair well with our other sandboxes for hours of exploratory fun. Its panels measure 24"W x 16"H (not including posts), and its overall height is adjustable from 24"-36"H.
