- Children can let their imaginations run wild
- Made from responsibly recycled plastic

Age Group: 6 months to 5 years

More space: more room to create. Engage the children in your life in four different ways with the Quadra Outdoor Magnetic Chalkboard. Our chalkboard has been designed to withstand the test of time; made from a vandal-resistant SureGrip™ coating that protects against etching and scratching, our board is customizable and available in a variety of hues, including red, yellow, blue, green, tan, black, and white. Plus, our four-foot panel is the ideal storage space for chalk and other drawing supplies. If you're looking for a chalkboard that features less panels, our in-ground version comes in many different panel "sizes", including Single, Double, Triple (T-configuration or Zig-Zag) and the Quadra (shown here). All of our chalkboards are designed to be ADA accessible so that kids of all ability levels can create and explore.
