- Turns freely on its axis
- Fun young children
- Contrasting green and tan is friendly and inviting

Age Group: 6 months to 5 years

Our classic, 100% recycled structural plastic steering wheel is an excellent addition to the Infant Modular Space or any other enrichment-based play accessory. A perfect tool to help children six-23 months in the development of their motor skills, this steering wheel is composed of heavy-duty plastic and comes in natural hunter green. Kids will use the steering wheel as a portal into hours of imaginative play, pretending to be delivery drivers, medics, or post office workers. Or, they can take cues from their parents and caregivers and act out familiar family scenarios. The possibilities are virtually endless. Our steering wheel is ADA accessible, requires minimal assembly, and feature stainless steel hardware.
