- Dividers underneath help keep the containers in the proper place

Age Group: 2 to 5 years

Where there are kids, there are messes. That's why this Clean Up Station with Stainless Bowl is designed to bring convenient cleaning anywhere. Since it is operated with a hand pump, it doesn't need any plumbing or hose connections, and can be installed anywhere. Simply fill the basin underneath the pump with clean water. The used water will collect in a separate basin underneath the counter. Both basins are easy to remove when they need to be changed. This Clean Up Station is a perfect addition to arts and craft areas with paint, snacktime areas, or outdoors. The stainless steel basin and recycled plastic surface are easy to clean.
