Age Group: 2 to 5 years

Footprint: 11' 4" L x 6' 10" W

Take to the water and pan for gold all summer long with our enchanting and interactive Triple Waterway. The waterway operates by having children add flowing water to the playset's tiered channels via garden hose. The hose attaches either to a bracket or through the child-operated pump. Children can build and take control of the channels by adding dams and other toys. Kids will race boats, leaves, and twigs from one waterway to the next, creating their own aquatic kingdoms and complex storylines. The Waterway is perfect for kids ages two to five and older and makes a great addition to any schoolyard, daycare, or museum.
