- Compact piece that fits in most playgrounds

**Age Group:** 2 to 5 years

Add some educational fun and inclusivity to your playground with our Freestanding Sign Language Panel. A 4'6" x 1'6" hunter green panel depicts the letters of the alphabet in American Sign Language, rendered in white, easy-to-recreate hand positions. The board features an arched top, two sturdy signposts, and is composed of recycled structural plastic. Children will communicate with other kids using their hands. Plus, the Sign Language Panel provides plenty of opportunities for teachers and caregivers to discuss themes of disability rights, tolerance, and advocacy. The Freestanding Sign Language Panel comes with a warranty, is weather-proof, and designed for children as young as two to five years old.
