---

Children will enjoy taking a load off and watching the clouds pass by overhead with the charming Kid Seat by Big Toys. This cute and functional one-person seat is the perfect size for a preschool child to catch their breath after a period of running, playing, exploring, and learning. The design will immediately conjure images of adult benches that Mom and Dad like to sit on, but now it's built just for the kids. Though made for the little tykes, this bench is still tough and durable like the adult park bench varieties. With a top made of 100% recycled plastic and legs made of powder coated steel, this seat can handle all comers in all seasons for years to come. The seat is a great addition to any grassy space on your playground or right next to where all the play is taking place. Either way, it represents a little spot of piece and comfort for the young ones. This piece is also available with a back as the Kid Bench.
