Who's that peeking through the peephole? With the Peek N Play, children can connect with friends and socialize while learning developmental skills. Little crawlers will greet their buddies on the other side of the playhouse window, as well as admire their reflection, and play a little tune using the accessory's built-in chimes and mallets. An incredible tool for children ages 6-23 months, the Peek and Play can hold six to eight children comfortably and measures 8'6" x 4'6". Plus, since it's on ground level, the Peek N Play is ADA accessible, with parents and caregivers able to comfortably watch the action and supervise. Made from sturdy, weatherproof materials, the Peek N Play will hold up to years of daily use.
