The Synchro Pod allows kids to spin rapidly, but safely, in place. Simply by shifting their body weight back and forth, they can build up momentum and reach a considerable speed, thanks to the Synchro Pod's tilted axis. Luckily, the seat has a rough texture for added traction, as well as handles built right into the seat for kids to grip. The Pod is easy to install in-ground on any play area which has proper surfacing for safety. It makes a great addition to any setup, since it takes up so little space and serves as a nice complement to slides and other thrilling activities.
