Age Group: 6 months to 3 years

Unit Size: 41" x 10" x 23"

No daycare center is fully complete without this Diaper Wall Shelf. It keeps baby diapers well within reach of adult caretakers, but out of the reach of the babies and toddlers themselves. Also, being mounted on the wall means that they are out of the way, and won't contribute to any messes. The brilliant design of this shelf allows you to organize the diapers into seven different compartments. This way you can sort them by size, or by the individual child who they are for. Beneath these seven compartments, there are larger shelves which are ideal for storing wipes, talcum powder, and other essential items that you need in order to provide the best possible care. It is made from hardy birch wood, which has a brightly colored appearance and a UV finish which guards it against scratches and other physical damage.
