- Designed to handle lots of children over a long period of time
- Comes with 8 straight and 12 curved pieces

Age Group: 2 to 5 years

Create a comprehensive space for kids to race around on their trikes and scooters with the easy-to-assemble and charming Trike Path. This twenty-piece set fits together to form a cycling track for toddlers and kids in elementary school and can be set up either indoors or outdoors to accommodate your school, park, or daycare's specific needs. Perforated lines down the center of the track ensure that children give each other enough space, and it adds an air of authenticity to the set. The Trike Path can accommodate around six children or cyclists at once and gives kids a contained and safe area to ride and develop their gross motor and balance skills. Pair the Trike Path with one of our speed limit signs to ensure that kids cycle at an appropriate speed. Assembly is quick and straightforward, so kids can start peddling immediately.
