Price \$8,553.00

Highlights:

- 8 feet Entrance heights on all shades
- Only available as in-ground mount
- Perfect for parking lots and walkways
- Multiple fabric and powder coating colors available

This Hanging Cantilever Shade Structure is the perfect way to provide shade to an outdoor area like storefronts, bleachers, or walkways. Its unique design places the supports for the shade off to the side, rather than underneath, which would take up valuable shady space and limit your options for setup. They can be set up alongside buildings, to keep customers waiting in line outside comfortable. The steel frame has a durable powder coat of paint, which keeps it rust-free and looking fresh even after years of outdoor exposure. The durable material that the shade is made from blocks both rain and excessive sunlight, making it a great fixture to have at any time of the year. This fabric is available in a wide variety of different colors, allowing you to select the one that best complements the aesthetics of your location.
