Age Group: 2 to 12 years

Capacity: 40 - 50 Children

Use Zone: 35' x 35'

The Snug Play Advanced System is an awesome set of play elements which gives children the materials they need to build the structures of their dreams. These modular play pieces can be combined and reassembled in an infinite number of different ways. The flexible Noodle pieces, which this set contains 50 of, are the beams and connector pieces which slot into the other pieces to form secure connections. The 3 Bump pieces, 2 Cog pieces, 2 Spider pieces, and a Pad piece, all of which have nodes which can support up to 6 Noodle pieces, allowing multi-directional building. The Wave and Wall pieces are great pieces for wall paneling, which give structures a unique shape. The most visually distinctive and exciting pieces are the blue and yellow Cones, which are tall spires that can be climbed, or built around. There is even a Loop Ring, which can be rolled around and worked into designs.
