

Snug Play Expert System

Price \$34,578.00

Highlights:

- Encourages children to work together
- Simple inclusive play
- Different ways to play with it or on it
- Many children can play at once

Age Group: 2 to 12 years

The Expert System is our largest and most comprehensive SnugPlay system, containing over 75 individual pieces. These components can be combined and reassembled by children to create wonderful new playscapes to enjoy, with wiggly Noodle pieces everywhere, joining the components together. The set contains plenty of pieces which are great for playing with on their own, like the Wall pieces that can be crawled under and the Cone pieces which can be climbed. Others, like the Cog, Bump, and Pad pieces are hubs for attaching up to six Noodle pieces. Kids can top off their amazingly engineered creations with a Spider Panel that acts as an effective roof. Kids will love climbing and crawling all over the Wave and Mound pieces, and will enjoy using them as unique building materials as well. The Expert System is the best possible set for getting kids to engineer and play in fantastic structures of their own design.
