Unit Size: 36" x 36"

The Infant-Toddler Table is furniture designed with youngsters in mind. Its 14-inch height is perfectly suited for infants who are just starting to grow out of high chairs. As they continue to get bigger, this height can be raised up to 19-inch. That's right, the table grows with them! Rather than an ordinary square shape, this table has a rounded cutout on each side. This allows children to scootch their chairs in closer to the table, so that they are surrounded on three sides. This makes it much harder for them to spill anything or tumble out of their seats. The edges of the table and its framework all have curved edges, making them safe for even the youngest kids to play around. For snack time, coloring, games, or activities, the Infant-Toddler table is a wonderful addition to any child care center. Chairs that match this table are sold separately.
